General Merchandise

<http://www.nittushoji.co.jp>

Supporting logistics, consumers, and industry with diverse products, services, and outstanding development capabilities

Our General Merchandise Division offers a wide variety of products for creating optimal business environments. Moreover, our nationwide network sells food products supplied directly from the farm to general consumers. Our Packing Materials Division focuses its industry-leading development capabilities on the creation of original packing materials to cater to individual corporate needs.

General Merchandise Division

Working in support of the optimal modern business environment

We offer a full range of products that are essential to today's business environment, from office supplies to information equipment, daily necessities, and gift items. We also operate a mail-order service in cooperation with Nippon Express that sell food products delivered directly from the farm to the homes of consumers. Our goal is to provide high quality products and services that anticipate the user requirements of tomorrow.

Packing Materials Division

Comprehensive packing solutions based on industry-leading technology

The Packing Materials Division engages in the comprehensive development, design, and manufacture of all types of packing materials. Products include special-purpose cases custom designed to meet individual transportation requirements as well as resource-efficient reusable packing materials. The Packing Materials Divisions commands outstanding technical capabilities especially in packing materials for merchandise of unusually complex shapes. Packing materials services are available at offices nationwide. Continuous product enhancement, cost reduction efforts, and an established system for instant delivery are self-understood.

State-of-the-art carton former model "Evolve"

High quality corrugated board cases

Major Products

A comprehensive range of corrugated board cases, packing materials, containers, Nittsu standard cartons, single-wall corrugated boards, home-delivery packing (a comprehensive range of boxes, bags, labels, covers), packing materials for home moving, office transfers, overseas relocation, art objects, and air cargo

Distribution Equipment

<http://www.nittushoji.co.jp>

From distribution equipment to building construction – Propositions for all requirements

The Distribution Equipment Division offers solutions for logistics rationalization, labor saving equipment for cargo handling, warehousing, transportation, and forwarding, as well as products with environment-relevant features. The Building Materials Division contracts for all types of building construction projects and sells construction materials and equipment.

Distribution Equipment Division

Sophisticated system propositions to support customers' logistics rationalization

The Distribution Equipment Division offers planning and propositions for the systemizing of customers' logistics operations based on logistics-center structures, warehousing, and transportation equipment tailored to customers' wishes. Solutions reflect the Division's highly successful cost reduction efforts such as through the overseas production of roll box pallets and box pallets. Moreover, in the environmental product line, waste compactors and recycling-based products marketed by the Division offer significant reductions in industrial waste disposal costs through waste compacting and volume reduction of waste such as films, corrugated boards, and packing bands.

Conveyer systems featuring outstanding safety and economy

Fold-up box pallet

Roll box

Major Products

Cargo handling, warehousing, transporting, and forwarding equipment, logistics peripherals, cargo moving equipment, environment management equipment, cooling equipment, and products made from recycled materials

Building Materials Division

Construction project diversity derived from years of experiences and know-how

Nittsu Shoji contracts for all types of building construction projects, spanning the width from high-rise buildings to logistics facilities. Thanks to our logistics experience and know-how accumulated over many years, we have a particularly strong reputation for the construction of logistics facilities such as warehouses and logistics terminals. Moreover, we handle a broad range of building materials and construction equipment and machinery consistent with the requirements of customers regarding cost, quality, and functionality.

From building materials to construction contracts

Freight elevator

Fresh concrete, RC segments, steel frame construction work, steel materials, steel reinforcement bars, window and door sash installation work, shutter installation work, autoclaved lightweight concrete construction work, roof and exterior wall construction work, roof and exterior wall materials, electrical construction work, HVAC and plumbing construction works, elevator installation work, middle filters, etc.

Leasing

<http://www.nittushojo.co.jp>

Total customer support for creating the ideal workspace

Today, leasing is an indispensable force for businesses seeking to organize their work environments and pursue economic efficiency. Relying on leading-edge technology and in-depth services, the Leasing Division of Nittsu Shoji proposes solutions that correspond to customers' requirements, creates ideal workspaces that motivate employees, and provides total support consistent with customers' business size and strategy.

Specialized services building on our strengths as a trading company

As a general trading company, we purchase a wide range of merchandise from our business partners. This diversity enables us to offer products that will satisfy the requirements of customers, whether as a lease, purchase, or installment purchase arrangement. Moreover, our nationwide network of

sales offices allows us to provide highly specialized services at the local level. Meanwhile, our automobile leasing business for all types of vehicles has developed a reputation for accurate and expedient services including finance lease and maintenance lease offerings.

A wide range of products for leasing to meet a diversity of customer needs

Major Products

Maintenance & Manufacturing

<http://www.nittushojo.co.jp>

Solutions to customer needs shaped by proven technology and creative ideas

Our Maintenance Division operates maintenance sites and service stations in major locations throughout Japan. Maintenance offerings include automobile safety inspections, check-ups, and repair services for various types of vehicles from large cranes to passenger cars. Additionally, the Manufacturing Division engages in design and building work ranging from car body accessories to trailers and containers.

Maintenance Division

A full array of services to handle any type of vehicle and equipment

The Maintenance Division offers a full range of services for all types of vehicles and equipment regardless of manufacturer and model. Built on proven technology and reliability, the Division has contracted with domestic and foreign manufacturers of trucks, construction equipment, and material handling equipment to serve as their designated contract partner factory. The Division also sells mechanical parts for various manufactures as well as vehicles including Volvo trucks.

New, relocated Fukuoka factory

Provides maintenance services for various types of vehicles and containers for all modes of transportation.

Key to modal-shift : 31-feet full-wing container

Manufacturing Division

A diversity of product offerings for innovative logistics

We offer a variety of products to meet all kinds of purposes and needs, ranging from the design and manufacture of trailers and containers to the design and development of vehicle accessories and own-brand products. Based on highly creative innovative ideas and technology, our approach to manufacture optimized transportation figure has earned us a strong reputation among both domestic and foreign clients.

6-axle self-steering extendible semi-trailer

Semi-trailer with allowable gross weight of 60 tons. The pallet is stretchable (3.5 meters) to carry large and heavy cargo up to 55 tons. The steering mechanism enhances ability to turn and operate.

31-feet full-wing container, contributing to carbon dioxide emission reduction

Petroleum

<http://www.nittushoji.co.jp>

Wide-ranging supply from wholesale to retail under contracts with 4 petroleum distributors

From sales of industrial-use fuel to retail services at service stations, our business comprises a wide range of operations. The absence of affiliations with specific petroleum distributors allows Nittsu Shoji to maintain contracts with several wholesalers. Centered on light oil, Nittsu Shoji has therefore been able to increase its direct sales volumes, including also in marine use heavy fuel oil, which has added to strengthening our position as a petroleum sales business.

From sales of petroleum products to the provision of retail services

In addition to providing fuel oil to the Nippon Express Group, we also engage in direct sales to users of industrial use fuel and engage in nationwide retail operations through directly managed outlets, affiliated companies, and agent service stations. In recent years, we have proactively engaged also in sales of environment friendly products and worked to meet our responsibilities as an energy supply company.

Ryogoku Service Station (Tokyo)

Bunker tanker Aikō Maru

Nittsu Energy Chugoku Co., Ltd., Shunan Service Station (Yamaguchi)

Major Products and Services

Petroleum products for automobiles, households, industrial use, and vessels
Coolants, aqueous urea solution and other chemical products, automotive products, fire extinguishers, etc.
Statutory vehicle safety inspection and maintenance, carwash services, non-petroleum products, etc.

Nittsu Shoji Fuel Card System

The Petroleum Division offers an own-brand fuel card system for corporate and co-op customers. Customers who use the Nittsu Shoji wholesale fuel card are issued for each of their vehicles a fuel purchase statement with details such as the date, place, type of fuel, amount of fuel, and price paid. The same information can also be provided as Excel data or other electronic format, allowing customers to aggregate their data by branch office, sales office, and co-op member, etc. This service is highly convenient for simplifying the vehicle management of customers with nationwide branch offices, sales offices, and coop members.

- Purchase fuel anywhere in Japan at the same price (excluding on expressways)
- Choose from four different fuel distributors
- Specify the product to be purchased
- Pay cashless

Liquefied Petroleum Gas

<http://www.nittushojo.co.jp>

From households to industrial users, wide-ranging supply of liquefied petroleum gas

Since the launch of our own brand "Nittsu Propane" in 1962, each year we provide over 210,000 tons of liquefied petroleum gas (LP gas) throughout Japan to 800,000 households and to various industries for commercial, industrial, and automobile use. Moreover, the Division also engages in sales of residential use equipment, renovation work, and plant construction work.

A promising source of environment-friendly clean energy

With around 1,000 LP gas sales stations and three Eco-Stations for automotive CNG fuel, we cater to a diversity of customer needs, centered on 43 depots throughout Japan as well as directly managed sales offices, LP gas stations, and nationwide Nittsu Propane dealers. Because LP gas has lower carbon dioxide emission than other fossil fuels, and almost zero nitrous oxide and sulfur oxide emissions, high expectations attach to LP gas as a source of environmentally-friendly clean energy. Being a wide-area dealer, our centralized 24-hour monitoring system "Keeper 24" ensures that LP gas supply to customers is at all times safe and secure.

LP gas depot

Bulk tanker

Natural Gas Eco Station
(Hachioji)

Major Products and Services

LP gas (residential, commercial, industrial, automotive), CNG (automotive), residential equipment, plant construction, etc.

Residential equipment for a life in comfort

Glass-top cooking stove

For perfect safety and convenience, all burners have intelligent temperature-sensitive Si (Safety and intelligent) sensors as standard equipment. Moreover, the installed glass tops provide ease of maintenance, safety, comfort, and hygiene.

ENE-FARM (residential-use fuel cell)

Since the ENE-FARM fuel cell is able to simultaneously generate electric power and heat up water, it is highly energy efficient and easy on the environment. Hot water generated simultaneously with electric power generation can be stored in a hot water tank until needed. Since a back-up water heater will supply hot water should the stored amount prove not enough, constant supply is assured.

Photovoltaic generation system

This photovoltaic generation system turns solar energy into electric power for priority use in the home. Since no carbon dioxide emission is involved, this method of energy generation is easy on the environment.

Electric power generation with ENE-FARM and the photovoltaic generation system

Any surplus electric power from photovoltaic generation can be sold to power companies. Since the power generation system prioritizes the use of power supplied by ENE-FARM, own consumption of photovoltaic power at home is reduced, which enables selling more photovoltaic power.

"Nippy" - The Nittsu Propane Image Character

Nippy was incepted in August 2000 as the "LP Gas Fairy" who delivers Nittsu Shoji's own-brand "Nittsu Propane" to users.

Using as a motif the "Sapphire Flame" associated with burning LP gas, the character is dressed so as to represent the image of wholesome Nature as a message that LP Gas is a source of clean energy easy on the environment.

Logistics Support Division

<http://www.nittushoji.co.jp>

Logistic innovation for next-generation logistics and distribution

Based on our extensive experience and track record in the field of logistics, we provide total logistics support from procurement to disassembly, packing, shipping, transporting, warehousing, and delivery. We are able to ship any item to any destination in the world and provide optimal solutions for the logistics issues and problems of our customers.

Third Party Logistics (3PL) provide high-level integrated distribution and logistics

Based on the powerful global network established by the Nittsu group and the experience and expertise accumulated over half a century, we provide customers with Third Party Logistics (3PL) designed to synchronize and align with customers' production and supply frameworks. We offer hybrid commercial distribution and logistics services that meld distribution functions from product order receipt and placement, procurement, inventory management, and sales activities, with

logistics functions such as packing, disassembly, warehousing, and transportation to assist customers in building a complete supply chain. To sharpen your competitive edge, we also focus on the implementation of advanced recognition IC tags, the development of resource-saving packages designed to reduce environmental load, and the automation of packing operations. In this way, our solutions serve to reduce customers' cost of logistics and increase business efficiency.

Service Offerings

Procurement Support Services

- Procurement, purchasing, sales
- Finance
- Order receipt and placement management
- Inventory management

Logistics Operations

- Mass-production logistics
- Equipment & machinery logistics
- Other logistics-related services

Packing Services

- Packing of mass produced items
- Packing equipment & machinery
- Special packing
- Sales of packing materials & containers

Logistics Support Division

 <http://www.nittushoji.co.jp>

Delivering Optimal Solutions for the Customer

Business logistics involves many strategic aspects in addition to standard logistics activities, such as transporting, warehousing, material handling, packing, distribution processing, and logistics information processing. To meet the global logistics needs compelled by customers' supply and demand chains, we emphasize strategic functions (planning,

forecast, management, R&D, system development) in every aspect of distribution and logistics from the procurement of materials and products to production and sales. To this end, Nittsu Shoji reviews customer logistics from the perspective of the customer, and together with the customer works out an optimal solution.

Experts in each field provide optimal packing solutions

Since its establishment nearly half a century ago, Nittsu Shoji has made constant advancement in its packing technology. Our professionals experienced in their fields will offer optimal packing solutions that increase transportation efficiency and reduce costs. Moreover, responding to the social requirements posed by environmental issues, Nittsu Shoji counts among the first to develop new materials and cases such as in-house produced reusable steel cases for packing.
